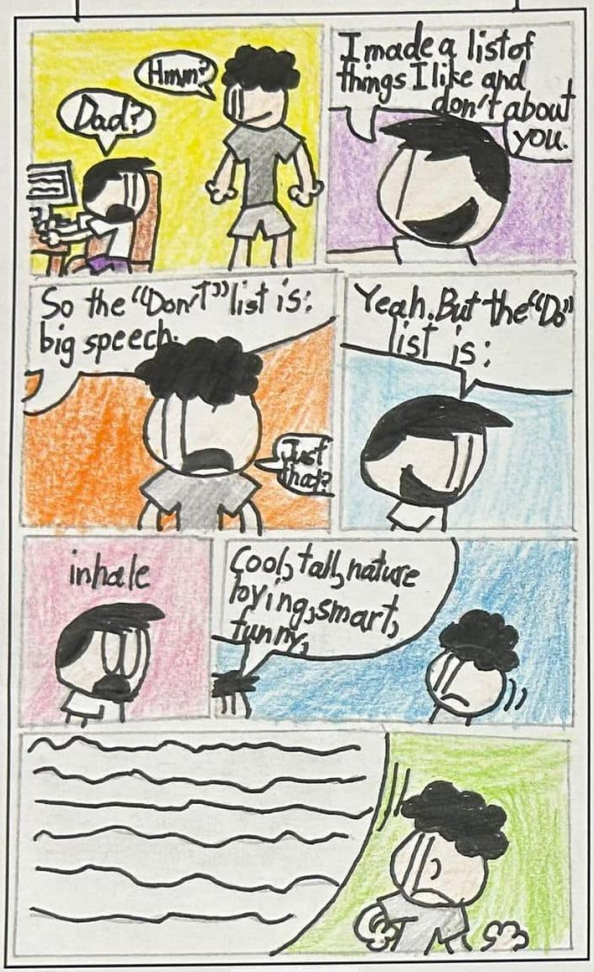
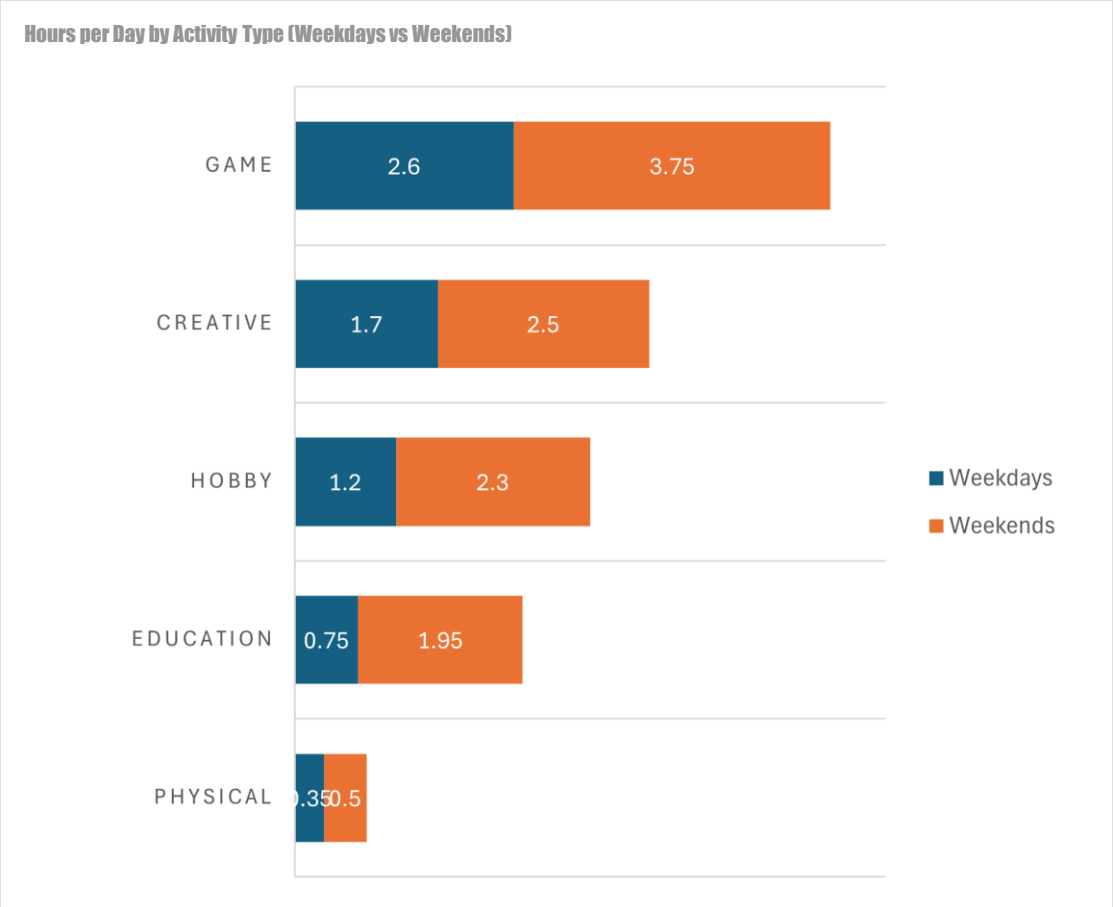
SPECIAL COMIC: For dad's BD



You're the #1 dad!
Love You!

WHAT THE TINY DATASET SAYS

WEEKDAYS VS WEEKENDS: MORE TIME, MORE MAKING, MORE LEARNING.



Yes, games grow on weekends.

But creativity and learning grow too.

The real surprise: making things stays strong.

From Dino-Expert to Comic Creator: A Data-Driven Parenting Story: The Growth Dashboard: Analyzing My 10-Year-Old's Weekly Activity

Primary Data Source (The Raw Log) / Feature Engineering (Contextual Metrics)

Day of Week	Activity	Type	Avg. Time (Hrs)	Dad Engagement	Social vs. Solo	Development Focu

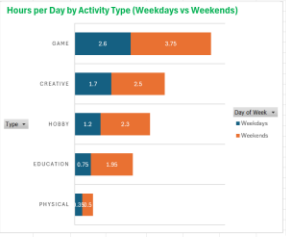
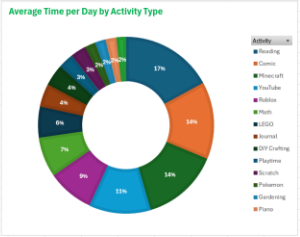
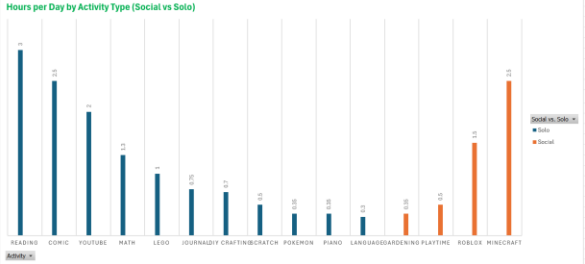
Visuals Analysis







Analysis of the Visuals

1. The "Weekly Pulse" (Stacked Bar Chart)

While **Gaming** is the largest total volume, the **Creative** and **Education** blocks are significant "stakeholder investments."
"Hobby" and **"Creative"** nearly double on the weekend.
This shows a healthy "release" of creative energy when school is out.

2. The "Portfolio View" (Donut Chart)

This chart provides a bird's-eye view of his personal 'Market Share.'
Literacy (Reading/Comics) and **Digital Play** (Minecraft) dominate the portfolio.
It shows a highly balanced 'Childhood Brand' that values both **traditional literacy** and **modern digital problem-solving**.

3. The "Social Connectivity" Story (Column Chart)

This visualization provides the data-backed 'defense' for **Gaming.**
By splitting activities into **Social vs. Solo**, we see that **Minecraft** and **Roblox** are his primary social outlets.
It proves he isn't just staring at a screen.
he's actively engaging with a community and building communication skills in a digital environment.
